Professional Summary

Passionate and detail-oriented web developer with hands-on experience in building full-stack web applications using modern frameworks such as React, Next.js, and Node.js. Strong foundation in front-end and back-end technologies, with a drive for continuous learning and creative problem solving. Actively contributes to open-source projects, collaborating with global developers to improve codebases and build meaningful tools for the developer community.

Technical Skills

JavaScript, TypeScript, React, Node.js, Next.js, Python, HTML5, CSS3, Tailwind, MongoDB, Express.js, Mongoose, SQL, Supabase, Firebase

Work Experience

Studio Graficzne Kunicki Design, Poland, PL

April 2025 - May 2025

- Implemented workflow automation using n8n, reducing manual data processing time
- Automated order process with n8n workflows, eliminating repetitive daily tasks
- Designed and deployed n8n automation solutions that streamlined the business process
- Built automated data pipelines using n8n, improving data accuracy and reducing processing errors

Education

Web Development Diploma

IEK AKMI | Rhodes, Greece

October 2022 – June 2024

Personal Projects

Regal Hive | Next.js, React, JavaScript, HTML5, CSS3

E-commerce web application for honey company featuring product catalog and shopping cart functionality.

- Developed responsive frontend using Next.js 14 App Router
- Implemented product browsing, cart management, and checkout flow
- Utilized Next.js advanced features including server-side rendering and dynamic routing

GitHub: github.com/gneo0/regal-hive | Live Demo: regalhive.org

TaskFlow Pro | MongoDB, Express.js, React, Node.js, JWT

Full-stack productivity application with task management, calendar integration, and performance analytics.

- Built MERN stack application with custom calendar, Kanban board, and Pomodoro timer features
- Implemented JWT authentication and authorization system for secure user sessions
- Developed REST API using Express.js with full CRUD operations for task and user management
- Created analytics dashboard displaying task completion rates and productivity metrics

GitHub: github.com/gneo0/TaskFlow-pro | Live Demo: taskflow-pro.onrender.com

Movie Verse | React, JavaScript, REST API, HTML5, CSS3

Movie information platform displaying trending and latest films with detailed movie data.

- Integrated third-party REST API to fetch and display real-time movie information
- Built responsive React components for movie browsing and detailed view functionality
- Implemented dynamic data rendering and state management for seamless user experience

GitHub: github.com/gneo0/Movie--Verse | Live Demo: movie-verse-031924.netlify.app

Chrome Dino Game | HTML5, CSS3, JavaScript, Canvas API

Browser-based recreation of Chrome's offline dinosaur game with collision detection.

- Developed 2D graphics using HTML5 Canvas API and vanilla JavaScript
- Implemented AABB collision detection algorithm for game physics and interactions
- Created responsive game controls and animation system for smooth gameplay experience

GitHub: github.com/gneo0/Chrome-Dino-game | Live Demo: chrome-dino242703.netlify.app
