Full-stack web developer with a logical, disciplined approach, dedicated to delivering efficient, scalable web solutions through strong teamwork, out-of-the-box problem-solving and engaging in open-source contributions.

Projects

Regal Hive
Present

An e-commerse web-application for a fictional honey company. Building this project, I learned the basics and advanced topics of Nextjs.

Movie Verse
Present

A project that includes information about the latest and trending movies. This project taught me the basics of React and how to integrate with a REST API and display it's data to frontend.

Taskflow Pro
Present

A productivity tool, built using MERN stack, that includes a custom Calendar, Kanban board for adding/editing personal tasks, a Pomodoro Timer. On this project I learned how authorization authentication works and how to create an API using Express.js

Core Skills

HTML, CSS, Tailwind CSS, Javascript, React.js, Typescript, Redux, Tanstack Query, Next.js, MongoDB, Node.js, SQL, Mongoose, Express, Three.js

Education

IEK Akmi
Oct 2022 - Jun 2024

 Web development - design
GPA 9.6 / 10

Certificates

The Ultimate React Course 2024: React, Next.js, Redux & More
Jan 2024
